C#

MySQL

Software/Tools

WordPress

Visual Studio

Unity 2D & 3D & VR

Frameworks/libraries

JQuery

PHP

node.js

Steam VR

AngularJS (small amount)

EMPLOYMENT

Self Solutions: (REMOTE) Washington DC, MD (April 2017 – December 2018)

Position: IT Specialist

- Manage and oversee creation of new technologies for Self Solution's software via managing an overseas development team from India. Oversaw the design/creation cycle of new technologies for our different clients' needs. Received business side requirements from boss and altered the objectives to fit technical specs so the development team could more easily work on current objectives.

Enermark Consulting (<http://enermarkconsulting.com/>) : WordPress Development (April 2019 – Present)

- Freelance WordPress contract where client needed a website for their new consulting company. Needed an online presence for future clientele referrals.

Charlenecoleman.com WordPress Development (April 2018 – Present)

- Freelance project where client needed website made to sell her book online. Created site from conception where I found site hosting and setup web services for the site. Then developed site using WordPress to client's satisfaction. I also am webmaster for client's site where I manage and correct any bugs or any additional needs from client.

Kellietabron.com WordPress Development (February 2018 – Present)

- Rebuilt portfolio site for client from the ground up using WordPress development tools. Built site to client's needs and worked with client to ensure everything was as desired. Currently working as webmaster for client in maintaining site functionality.

PROJECTS

The Econeer Unity VR Project, C# (<http://econeer.cias.rit.edu/>)

- Sustainability is an important and pressing issue that can benefit from an educational VR experience. Econeer is a virtual reality game that gives the user control to affect an environment. The user creates a piece to add to a larger whole.

Weather API Project HTML, JavaScript, CSS, JSON, API (June 2018)

- Completed a project for a recruitment test that had me create a simple weather app that would show data from an API. The home page has basic info on 5 cities and when one is clicked more detailed information is displayed in the form of HTML tables.

Web and Mobile Development HTML, CSS, JavaScript

- Project Manager for development and design team to build a website from creation to launch. Responsibilities include assigning team deliverables for: design document and coding for sections. Assure team meets all deadlines, schedule and lead check in meetings.

EDUCATION

Rochester Institute of Technology: Rochester, NY (Graduate: December 2017)

- Bachelor of Science in New Media Interactive Development
- Minor in Web Development
- Dean's List (Spring 2016)
